SUMMARY

Software Engineering graduate and Full-Stack Developer focused on building functional web applications using the MERN stack. Experienced in developing responsive interfaces with React.js and Tailwind CSS, and managing backends with Express.js, Node.js and MongoDB. Capable of handling the full development lifecycle, from designing UI components to implementing secure APIs and database structures.

SKILLS

Frontend Development: React.js, Next.js, Expo, Javascript, TypeScript, Tailwind CSS, HTML5, CSS3, Redux Toolkit, Reanimated, i18next (Localization), High-fidelity UI/UX Design.

Backend Development: Node.js, Express.js, MongoDB, RESTful API Design, JWT Authentication, Postman (API Testing).

DevOps & Tools: Ubuntu Server, Nginx (Reverse Proxy), aaPanel, Expo, EAS Build & Update, Git, GitHub.

PROJECT & EXPERIENCE

GrablyDelivery – Full-Stack Delivery Management System

Grably • grablydelivery.com/ •

November 2025 – May 2026 Rif Dimashq

- **Engineered** a high-fidelity cross-platform mobile application using React.js and **Expo**, implementing advanced
- **Reanimated v3** animations for a professional user experience.
- **Developed** a multilingual interface (Arabic/English) with **i18next**, including a specialized OTP verification flow that ensures LTR input for numeric codes.
- **Architected** a scalable backend using **Node.js** and **Express.js**, integrated with **MongoDB** to handle real-time order processing and data management.
- **Configured** a production-ready **VPS environment** on **Hostinger** using **aaPanel** and **Nginx** reverse proxy, ensuring 99.9% uptime and secure SSL communication.
- **Optimized** the deployment pipeline by implementing **EAS Build** and **EAS Update**, allowing for seamless over-the-air (OTA) updates to the production environment.
- **Integrated** a secure **RESTful API** with **JWT** authentication and refresh tokens to protect user data and maintain persistent sessions.

School Management System – Frontend Interface

Ain Mneen Sharia High School • github.com/HasanAbd123/SchoolManagementFrontend.git •

June 2025 – September 2025

- Developed a professional, multi-dashboard web application using React.js and Tailwind CSS, integrating RESTful APIs

Real Estate Marketplace – Frontend Development

Personal • hasanabd123.github.io/Real-Estate/ • April 2025 – May 2025

- **Developed** a modern and interactive real estate web application using **React.js**, focusing on a seamless Single Page Application (SPA) experience.
- **Designed** a clean and responsive UI using **Tailwind CSS**, incorporating smooth transitions and professional layouts for property showcases.

EDUCATION

Bachelor of Engineering in Information Technology Engineering (Software Engineering)

Damascus University • Damascus, Syria • 2025

- **Graduation Project:** Designed and developed a comprehensive **"Student Transportation Management System"** for a specialized transport company.
- **Role & Implementation:** Focused on engineering the frontend architecture and ensuring efficient data flow between administrative modules and real-time tracking features.

• **Key Coursework:** Data Structures & Algorithms, Software Architecture, Database Management Systems (DBMS), and Web Engineering.
